

A NEW CONCEPT

EU Patent Pending

FREEDOM GIRTH

by

SCHARF

WESTERN

YOUR SAFE SADDLE, YOUR FREE HORSE

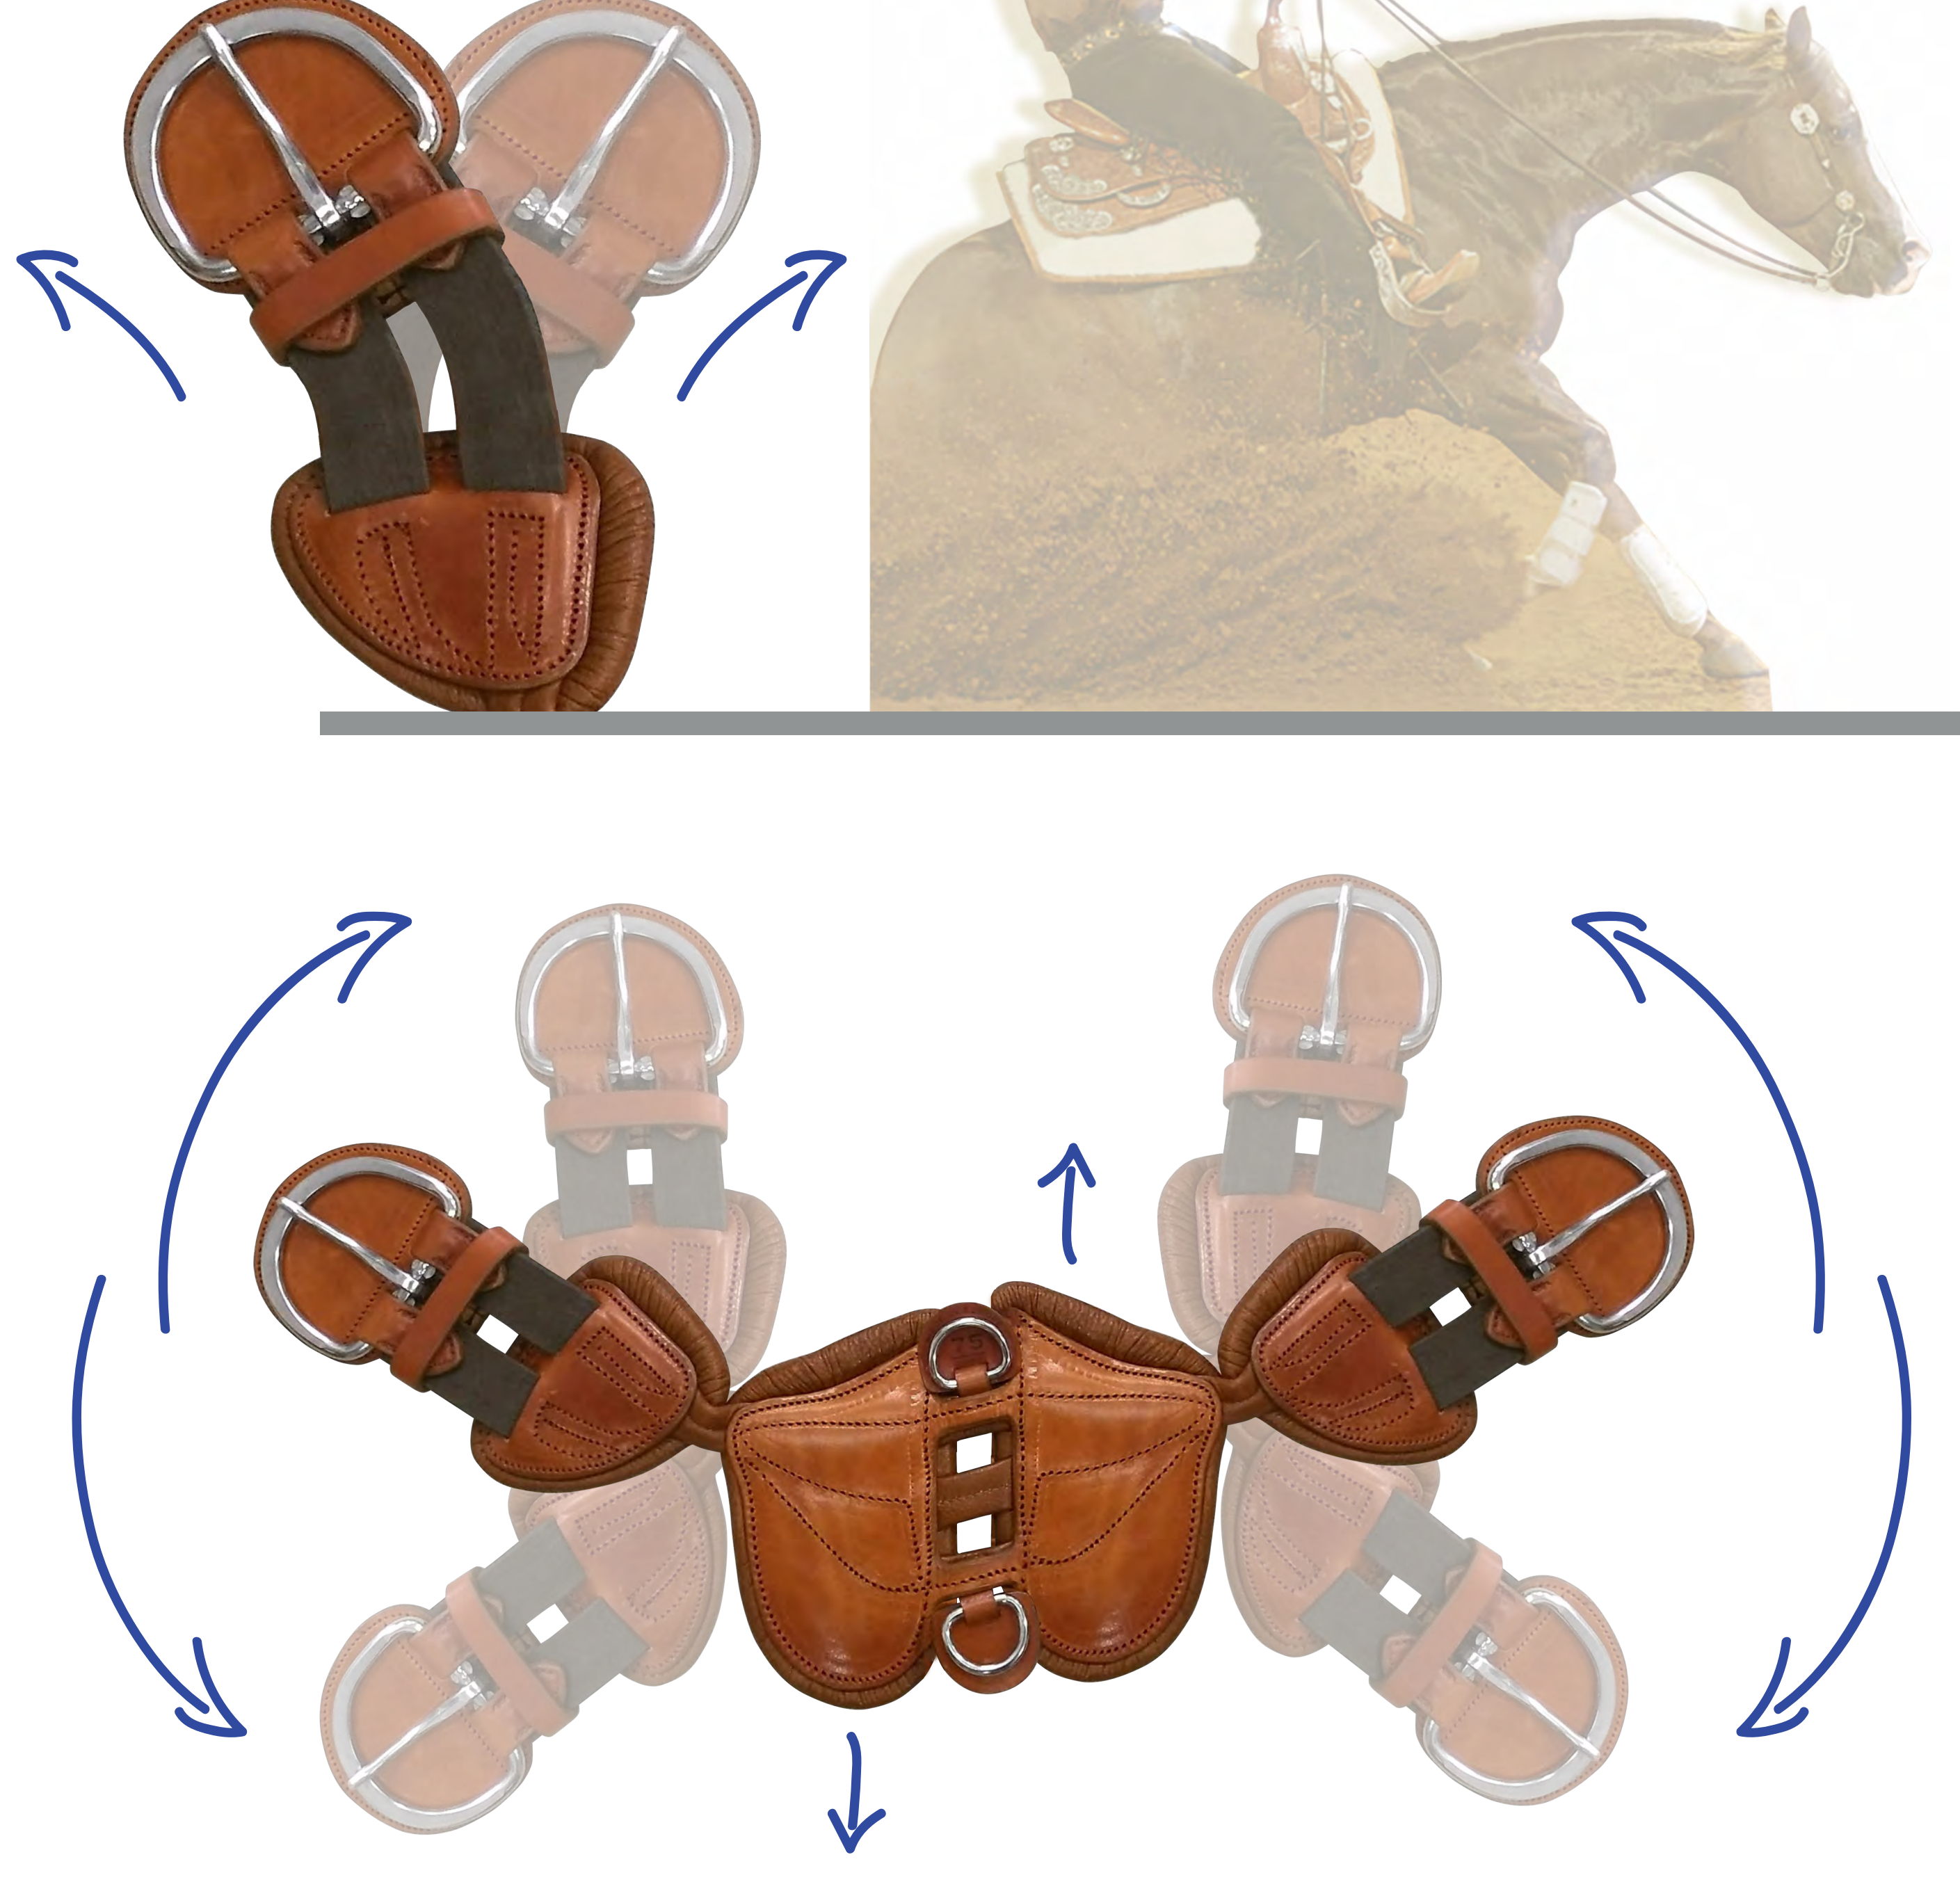

WESTERN FREEDOM GIRTH BY SCHARF IS UNIQUE AND THE FIRST BIOMECHANICAL CONCEPT OF GIRTH IN WESTERN DISCIPLINE.

- Externum.
- Externals intercostals.
- Pectoralis ascendens.
- Oblique abdominis externus.

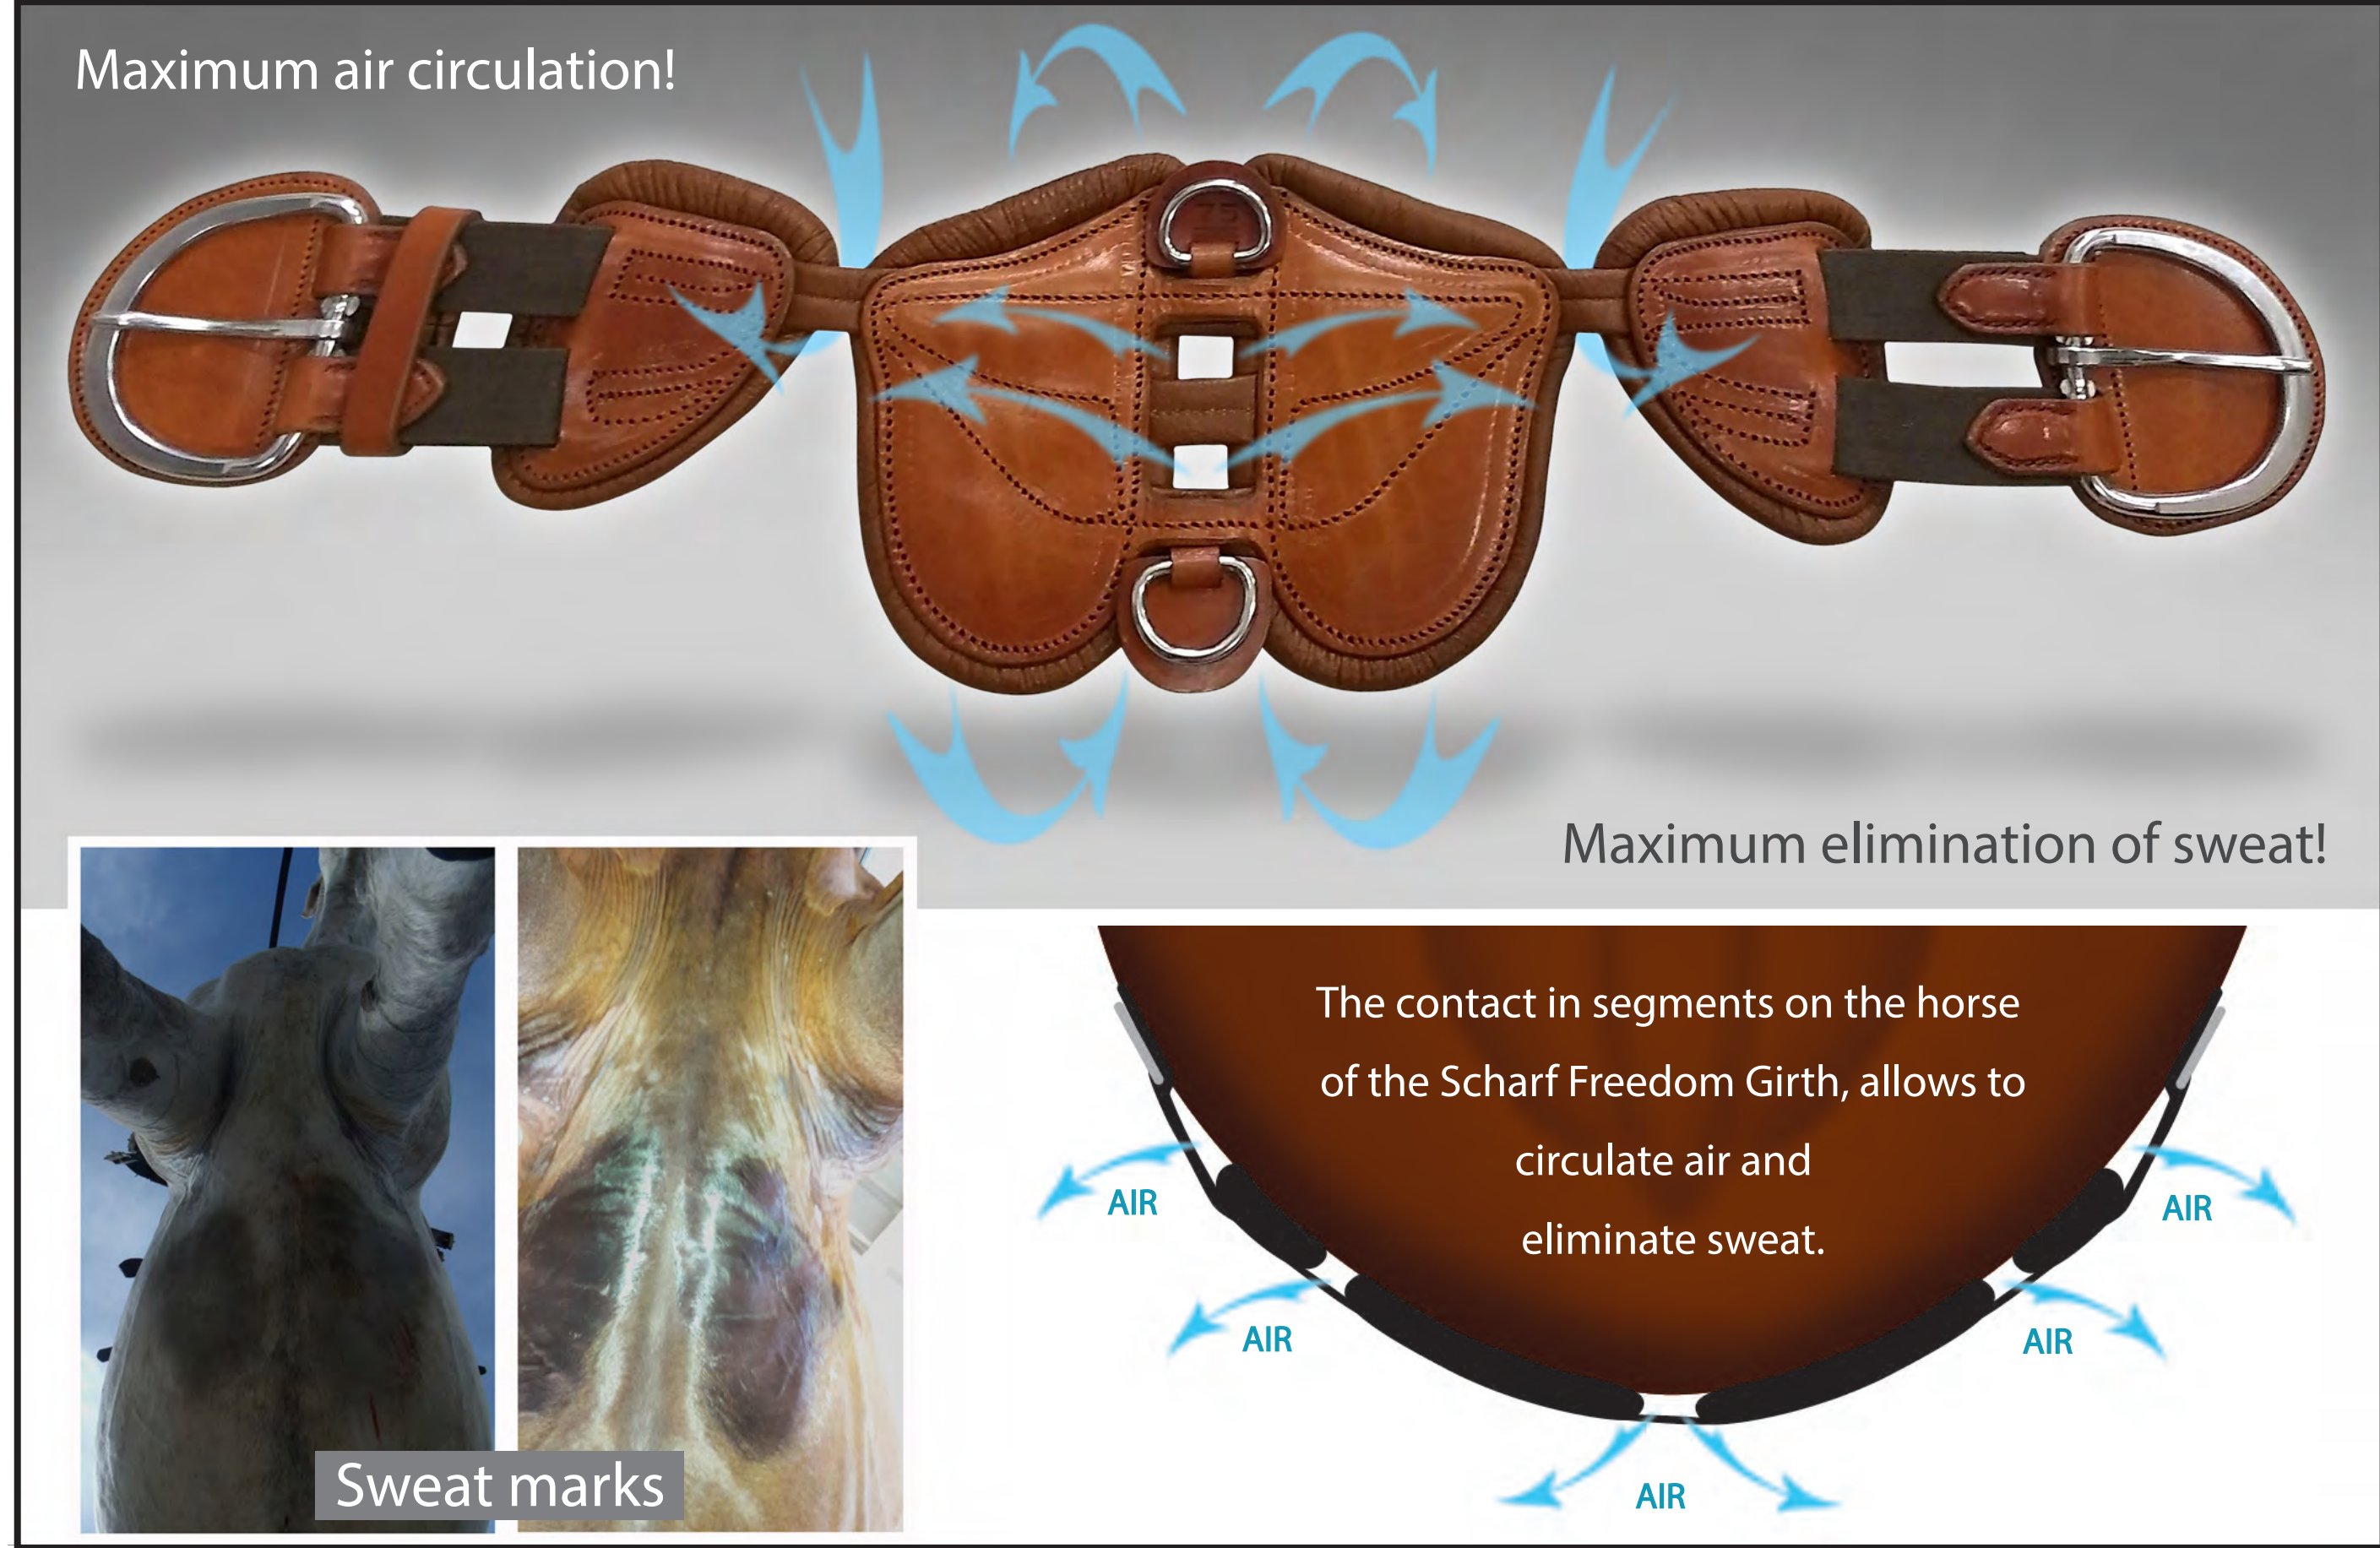

The exclusive design of the Scharf Freedom Girth, was designed such that each part of it, work with a particular muscle of the chest without interfering with the free functioning of other muscle.

MOVEMENTS WITHOUT LIMITS

Its exclusive design and biomechanics functions allow the horse to have free muscle movements at all times, giving a unique freedom never before achieved with a western girth.

This patented girth is of superior quality, it is manufactured in Europe with characteristic details of craftsmanship and high quality European leathers. This girth for exquisite riders gives them the best performance with elegance and style.

Now, the high Western competition, has the first intermuscular girth that meets all the requirements of this discipline, respecting the anatomy, collaborating with biomechanical functions and avoiding the extreme oppression caused by conventional girths.

VERY IMPORTANT:

PLEASE NOTE WHEN PLACING THE GIRTH FREEDOM BY SCHARF, IT SHOULD NOT BE ADJUSTED ONLY ON A SIDE, BUT ON THE RIGHT AND LEFT ON THE SAME.

PLEASE READ THE INSTRUCTION BEFORE USE.
